PROFESSIONAL SUMMARY

Software Engineer with 5+ years building and shipping production apps across mobile, tablet, web, and desktop. Has delivered 40+ apps to the Apple App Store and Google Play. Specializes in cross-platform development with Flutter and React Native, backed by Node.js and Firebase. Experienced leading mobile and web product development from design hand-off through to release, and currently exploring on-device AI with TensorFlow Lite.

TECHNICAL SKILLS

Languages: Dart, TypeScript, JavaScript, Java

Mobile: Flutter, React Native, Expo, Android (Java), iOS, In-App Purchases, Localization (i18n)

Web: Next.js, React, Flutter Web, Tailwind CSS, Responsive UI, SSR, PWA, SEO

Backend & Cloud: Node.js, Firebase, REST APIs

Desktop: Flutter Desktop, Electron, Tauri

AI & ML: On-device AI, TensorFlow Lite

Practices & Tools: Git, App Store & Google Play release, Cross-platform architecture, Agile delivery

PROFESSIONAL EXPERIENCE

Speak Silq

2026 to Present

Software Engineer, Mobile · Remote (USA)

- Build and ship Speak Silq, a gamified language-learning app, end to end in React Native, delivering a single codebase to both the App Store and Google Play.
- Deliver 20+ languages and dialects across the Central Asian, South Asian, and Afghan diaspora, handling regional variants such as Afghan Dari and Pashto.
- Own lesson and gamification flows, audio playback, progress tracking, an in-app translator, in-app purchases, and a flashcard system.

Independent Developer

2026 to Present

Freelance Mobile Developer · Remote

- Design, build, and publish original apps end to end, with Foco, TimeMagick, and Fantasia World live on the App Store and Google Play.
- Built Foco, an ADHD focus app in Flutter with AI task breakdown and focus sessions, shipped to iOS and Android from one codebase.
- Shipped TimeMagick, a React Native team time-tracking app combining timers, live status, project chat, and expense tracking.

Vendaxis

2024 to 2026

Senior Software Engineer, Cross-Platform Lead · Hybrid (UAE & Pakistan)

- Led mobile and web product development across the team, owning cross-platform architecture from design hand-off to production.
- Architected Flutter apps with Node.js backends, shipping features used by thousands of vendors daily.
- Mentored developers and set the standard for release quality across iOS, Android, and web.

D Explore X

2022 to 2024

Mobile App Developer · On-site

- Built and shipped cross-platform mobile apps for client products, owning features from design hand-off to release.
- Delivered QR Zen, a privacy-first Flutter QR scanner and generator, live on Google Play.
- Built marketing and services websites, including Taknoart Associates and Faryad VTI, with responsive UI, SEO, and online admission flows.

Paragon Logics

2020 to 2022

Mobile App Developer · On-site

- Started professional career building native Android (Java) and Flutter apps, growing into a confident cross-platform developer.
- Shipped Beautylounge.ch, a Flutter salon booking app with a 500+ colour catalogue, to iOS and Android.
- Built JobNRoll, a bilingual (English and Greek) hospitality job marketplace connecting candidates and employers.

SELECTED PROJECTS

- **Speak Silq** (React Native, TypeScript, Node.js, Expo): Gamified language-learning app for the Central, South Asian, and Afghan diaspora. Live on iOS and Android.
- **Foco** (Flutter, Dart, Firebase): ADHD focus companion with AI body doubling and one-subtask-at-a-time task breakdown.
- **TimeMagick** (React Native, TypeScript, Node.js): Team time-tracking and collaboration with timers, live status, project chat, and expenses. Live on iOS and Android.
- **Fantasia World** (React Native, Expo, TypeScript): Music fan platform for events, exclusive merch, and community. Live on iOS and Android.
- **JobNRoll** (Flutter, Dart, Node.js): Bilingual tourism and hospitality job marketplace connecting candidates and employers.
